Basic Mechanical Toys and Movement

Level: Nursery 1 (Ages 2.5 – 4)
Duration: 9 Weeks (2 Sessions per Week)
Session Duration: 30–45 minutes
Total Sessions: 18
Session Duration: 30–45 minutes

Week 1: Introduction to Robots and Toys

Teacher Handbook

Prepared by BLIS GLOBAL Robotics Department

Copyright @2024

Objective: Create and play with DIY spinner.

- **Activities:**
  - Use cardboard circles and pencils to create spinners.
  - Decorate with colors. Overall Learning Goals
    - Understand basic types of movement (push, pull, roll, spin).
    - Recognize mechanical components in toys (wheels, axles, levers, gears).
    - Encourage curiosity, fine motor skills, and creative expression.
    - Develop early engineering thinking through structured play.

Week 1: Introduction to Robots and Toys

Session 1: Story Time - What Is a robot?

- Objective: Introduce the idea of robots through storytelling.
- Activities:
  - Read a simple book about robots (e.g., "Boy + Bot" or similar).
  - Discuss with pictures: What looks like a robot?
  - Show real robot toys or images.
  - Sing the “Robot Dance” song.

- Materials: Robot picture cards, toy robot, storybook. Session 2: Sorting Toys – Robot or Not?
- Objective: Differentiate robots from other toys.
- Activities:
  - Sorting game: Robot vs. Not a robot (using cards or physical toys).
  - Introduce a toy robot that moves (with batteries or manually).
  - Draw a robot with help.
- Materials: Toy collection, sorting mats, crayons.
